Telecom Minister Ashwini Vaishnaw on Thursday said that the new telecom bill will provide a clear roadmap for industry restructuring and promote innovation.

While speaking at a Public Affairs Forum of India event, the minister said in the next one and-a-half years to two years, the government should be able to completely revamp the entire digital regulatory framework which aims to balance the societal objectives, digital rights of individuals, and a technology agnostic framework.

“Industry does go through various phases. Sometimes because of business environment

He said that the digital world needs a comprehensive set of legislations and the Prime Minister has given the telecom ministry the target that India's digital legal framework regulatory framework should be globally benchmarked.

“That doesn't mean that we simply go around and copy whatever is best in the world means we have to aim at creating a digital legal framework, which the world should learn from and study. That's a very big objective, but it's possible,” Vaishnaw said. According to the Telecommunication Bill 2022, over-the-top players like [WhatsApp](#), [Zoom](#) and [Google](#) which provide calling and messaging services — may require licences to operate in the country.

The draft bill has included [OTT](#) as part of the telecommunication service. The government in the bill has proposed a provision to waive fees and penalty of [telecom](#) and [internet](#) service providers.

The ministry has also proposed a provision for the refund of fees in case a telecom or internet provider surrenders his license.

Vaishnaw said that the next 25 years will be a period of inclusive growth and investment will be the primary tool for the growth and there will be focus on manufacturing, innovation and simplification of rules and reforms in social infrastructure like education and health.
