Session 5 - Empowering the Gig Economy

Thursday, October 26, 2023

1500 - 1550 Hrs

Vote of Thanks

Arijit Das
Head – Public Policy & Government Affairs
Indrive

Arijit is an ardent technology enthusiast with a remarkable 13-year background in policy advocacy. Throughout his career, he has held significant positions at esteemed companies like HP Inc and vivo, where he played a crucial role in shaping policies related to AI, cloud computing, 3D printing, hardware manufacturing, and supply chain localization.

With a strong focus on collaboration, Arijit has established meaningful partnerships with the Ministry of Electronics & Information Technology and various Central & State level institutions. His involvement in AI and 3D printing projects demonstrates his dedication to advancing technology and fostering innovation.

Arijit's passion extends beyond the professional realm, as he actively contributes to diverse technology forums and panels, showcasing his commitment to technological advancements and meaningful discussions.

On a global scale, Arijit aims to make a profound impact by contributing to technology and policymaking. He seeks to create frameworks and guidelines that promote innovation while ensuring the protection of individual rights, privacy, and security. Recognizing the complexity of technological challenges, he believes in

the power of global collaboration and collective efforts to create an inclusive digital future.

Ultimately, Arijit's dream is to leave a lasting and positive imprint on the world of technology policy. He aspires to contribute to the betterment of society through responsible and sustainable technological advancements, fostering an environment of progress and social welfare.
